July 1909. K. J. J. J. J. J.

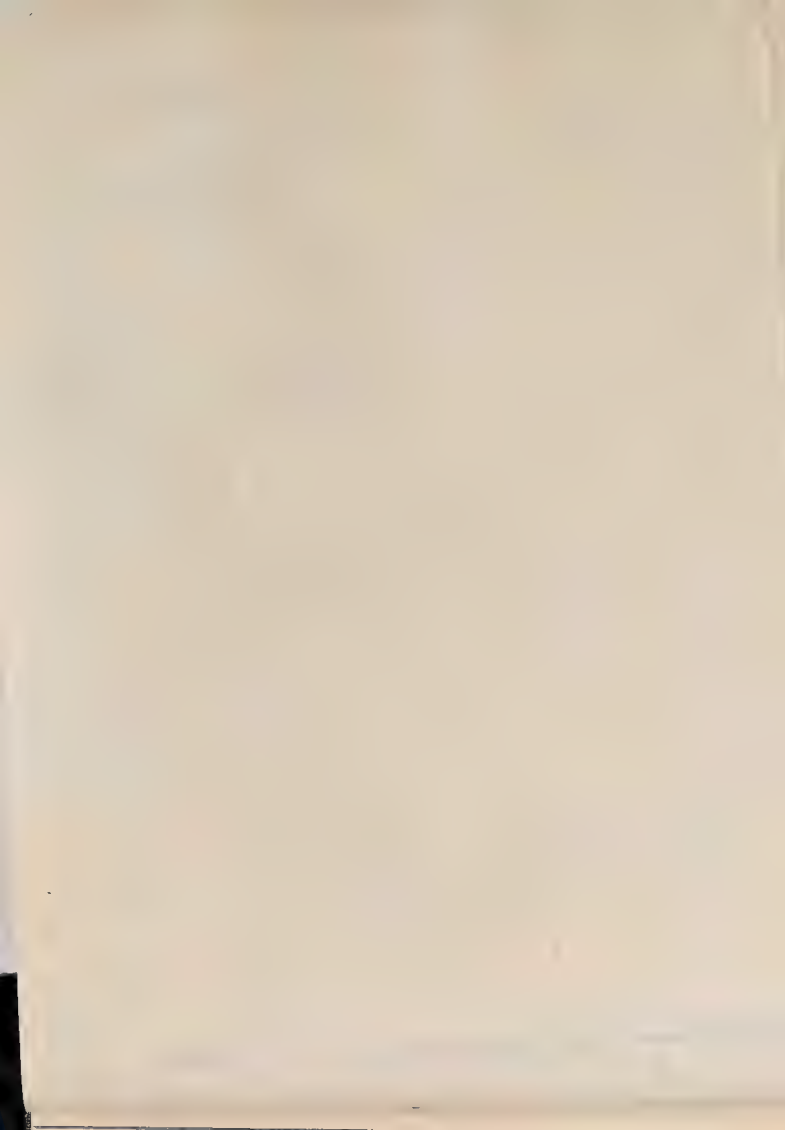

There is a difference in the way the two are used.

July 21, 1911. To Mr. J. H. Biglow & Co. New York 12
New York City, N.Y. (J.H.B.)

My dear Mr. Biglow:
I have the honor to acknowledge the receipt of your letter of the 17th inst. in relation to the matter of the purchase of the stock of the New York City & Hudson River Railroad Company, and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.

Pedicularis canadensis

Superior California 700-800-1000

Polyporus frigidus (Fr.)

1. *Chrysomelids* (Coleoptera: Chrysomelidae) are the most diverse group of beetles in the world, with over 100,000 species. They are found in all parts of the world, and are particularly common in temperate regions. Many species are important agricultural pests, while others are beneficial to the environment.

1. The first part of the paper is devoted to a review of the literature on the topic of the paper.
